Shubham Jagadale

Experienced Technical Support Specialist | Proficient in Docker & Kubernetes | Expert in Linux Systems & Automation | Azure & Kafka Professional | Driving System Reliability and Efficiency | MSSQL DBA | AI Enthusiasts

Pune Division, Maharashtra, India

Summary

Navigating the dynamic tech landscape has been my arena for over 6 years, where I've honed my skills in technical support and infrastructure management. With a penchant for diagnosing complex software and hardware issues, I ensure smooth digital operations for entities like Walmart Global Tech and various high-stakes clients across Asia.

As a Technology Service Engineer, my day often involves sophisticated tools like Linux, Kubernetes, and Azure. My expertise also extends to building CI/CD pipelines and automating cloud infrastructures, significantly enhancing system reliability and efficiency.

My real pride lies in my knack for problem-solving—be it through leading platform teams to maintaining a stunning 99% uptime or through my proactive troubleshooting that decreases incident recurrence by 25%.

Why stop at just resolving issues? I'm passionate about mentoring upcoming talent and refining processes that bolster not only tech operations but also team capabilities.

I'm eager to connect with like-minded professionals and explore avenues where my technical and leadership skills can further drive technology's potential in simplifying business complexities. Feel free to reach out or follow my journey here on LinkedIn!

Experience

Capgemini
