Dristi Soft Solutions PVT LTM, 04/2022 – 01/2023 | Mumbai, Maharashtra
Implementation Engineer-II / Senior Product Engineer -II

- Delivered four projects for Asia-specific clients, including HDFC Ergo and Bank of Baroda.
- Completed all projects within established timelines.
- Provided comprehensive product support throughout project lifecycle.
- Configured infrastructure setup, including server configuration on-premises, cloud, and virtual machines.
- Established high availability, cold failover, and disaster recovery setups with clustering capabilities.
- Managed configuration of FTP, NTP, LDAP, Nginx, Apache servers, and monitoring tools like Zabbix.

- Executed database tasks such as backup, restore, migration, and performance debugging on master-slave architecture.
- Conducted UAT testing, product training for clients, and facilitated ongoing client interactions post-delivery.
- Assisted in troubleshooting problems encountered during manufacture and assembly operations.
- Coordinated with cross-functional teams such as engineering, marketing, production, sales, and customer service to ensure successful execution of product development projects.
- Provided technical support to customers concerning use of company's products.

Appnomic Systems PVT LTM, Customer Support Engineer 03/2021 – 04/2022 | Bangalore, India

- Developed training materials and procedures for optimal product usage by end-users.
- Modified and customized commercial programs to meet internal requirements effectively.
- Conducted technical sessions with PD teams to troubleshoot issues and provide support.
- Resolved user inquiries related to company products and operations promptly.
- Delivered over 10 projects for Asia-specific customers in collaboration with PD teams from 2019 to 2021.
- Configured servers, performed infrastructure checks, and ensured prerequisites for smooth product operation.
- Executed database resource configuration for optimal load performance, including backup and migration tasks.
- Supported product deployment through installation of essential packages and integrations with social media and third-party tools.
- Created detailed documentation regarding customer interactions and resolutions.
- Monitored system performance to identify potential problems.
- Developed procedures for resolving common customer issues quickly.
- Provided technical support for customers, troubleshooting hardware and software issues.
- Developed and maintained comprehensive knowledge base articles for customer self-service.
- Collaborated with engineering and product teams to identify and rectify product issues.

Qualsquad Infotech Private Limited, 09/2020 – 03/2021 | Pune, Maharashtra
Product Support Linux

- Managed all servers hosting product in Docker containers.
- Installed and configured VMware and Docker environments.
- Created and deployed Docker images for operational efficiency.
- Monitored Docker container logs to ensure optimal performance.
- Automated server maintenance using Ansible and Bash scripts.
- Facilitated client and vendor interactions via Jira, ServiceNow, and Quickbase.
- Maintained system performance and ensured smooth operation of all applications.
- Demonstrated strong problem-solving skills, resolving issues efficiently and effectively.

Ace Computer Services, Desktop Support L2 Engineer 05/2018 – 10/2019 | Pune, Maharashtra

- Provided comprehensive support for IT systems and client applications on-site.
- Executed OS installation and troubleshooting for both Ubuntu and Windows environments.
- Configured server networks, firewalls, routers, and switches to enhance connectivity.
- Conducted software installations and provided ongoing support for Outlook.
- Monitored web applications to ensure optimal performance and reliability.
- Installed and troubleshot printers to maintain operational efficiency.
- Collaborated with internal IT teams at bank to resolve technical issues effectively.
- Managed user accounts in Active Directory in order to maintain secure access controls across the domain environment.
- Resolved escalated customer complaints in a timely manner.
- Provided technical support for end users on various issues related to network connectivity.

- Performed software upgrades on network devices to ensure compatibility with existing infrastructure.
- Installed, configured and maintained network devices such as routers, switches, firewalls and wireless access points.
- Deployed virtual private networks for remote access of corporate resources.
- Documented processes and procedures related to network operations and maintenance activities.
